

Amendment to the Specification:

Please replace paragraph [0062] with the following amended paragraph:

[0062] Figures 16a-d show histology of mouse brain sections after phage f88-EFRH clearance. Brain sections of olfactory organ (Figure 16a) and ~~hippocampus~~-hippocampus (Figure 16c) after 28 days following phage f88-EFRH administration were stained with hematoxylin and eosin, and compared to sections of an untreated brain (Figures 16b and 16d, respectively). The stained sections were examined and photographed at a final magnification of x 40.
